I have a passion for UX development. From creating music as a lead guitarist in multiple bands to creating cocktails as a professional bartender, User Experience has always been the core focus of my diverse professional history. The rhythm and harmony of artistry and technology that I've applied to my work allows me to develop content that maximizes user experience for much more than just how it looks. I want to write code for the future, for the Internet of things.

CORE COMPETENCIES

- Expert in **HTML5**, CSS3, **Sass**, Jade, Haml
 - Proficient in JavaScript, jQuery, Node.js
 - **agile** methodology
 - **Git**
 - Project Planning
 - Prototyping
 - Wire Framing
 - Experience with **Progressive Enhancement** Web Development
 - Paired Programming
 - Refactoring
 - Design
-

PROJECTS

MaxBrockman453.github.io

- Portfolio site featuring interactive menus, buttons, and my coding blog

Refactors.com

- Team built fully functioning Ruby on Rails website from ground up

EDUCATION

Code Fellows, Seattle WA

- Certificate of Completion of Front-End UX Design and Development Accelerator
